**Undergraduate Biomedical Engineering Preparation.** Any course taken at Cornell to satisfy the preparation requirement counts as a technical elective:

1). **Molecular Biomedical Engineering** (e.g., BME 3010-Fall). If you have not taken this course, then it will count as a technical elective course. If completed, please list courses already taken:

   ____________________  ____________________  ____________________

2). **Cellular Biomedical Engineering** (e.g., BME 3020-Spring). If you have not taken this course, then it will count as a technical elective course. If completed, please list courses already taken:

   ____________________  ____________________  ____________________

3). **Quantitative Engineering Physiology I** (renal, respiratory, cardiovascular, and musculoskeletal systems) (e.g., BME 4010-Fall). If you have not taken at least one course, then take at least three credits as a technical elective course (see technical elective section). If completed, please list courses already taken:

   ____________________  ____________________  ____________________

4). **Quantitative Engineering Physiology II** (chemical and electrical control and communication systems) (e.g., BME 4020-Spring or BME 6501. If you have not taken at least one course, then take at least three credits as a technical elective course (see technical elective section). However, students interested in orthopedic biomechanics are strongly encouraged to take BME 4010. If completed, please list courses already taken:

   ____________________  ____________________  ____________________

**Undergraduate Biology Preparation.** Any course taken at Cornell to satisfy the preparation requirement counts as a technical elective:

1). **Molecular and Cellular Biology**, e.g., Biochemistry (e.g., BIOMG 3300-Fall or Spring), Genetics (e.g., BIOMG 2800-Fall or Spring), Cell Biology (e.g., BIOMG 4320-Spring), Microbiology (e.g., BIOMI 2900-Fall or Spring). If you have not taken at least one course, then take at least three credits as a technical elective course (see technical elective section). If completed, please list courses already taken:

   ____________________  ____________________  ____________________

2). **Physiology**, e.g., Neurobiology (e.g., BIONB 2220-Spring), Animal Physiology (e.g., BIOAP 3110-Fall), Mammalian Physiology (e.g., BIOAP 4580-Spring), Developmental Biology (e.g., BIOMG 3850-Fall), Embryology (e.g., BIOMG 4890-Spring). **Taking both BME 4010 and BME 4020 satisfies this requirement.** If you have not taken at least one course, then take at least three credits as a technical elective course (see technical elective section). If completed, please list courses already taken:

   ____________________  ____________________  ____________________
The College requires at least 30 credits (no more than 2 credits graded S/U), a GPA of 2.5, and no grade lower than a C-.

**Core Degree Requirements (22 Credits).**

**List for Cellular engineering, tissue engineering, and drug delivery area:**

**Fall Courses:**
- CHEME 5430 – Bioprocess Engineering
- BME 5850 – Practice in Tissue Engineering
- BME 5400 – Biomedical Computation* (next offered FA15)
- BME 6310- Principles of Drug Delivery

**Spring Courses:**
- BME 7600/BEE 7600 – Nucleic Acid Engineering
- AEP 5520 – Physics of Life
- CHEME 5440 - Systems Biology in Biotechnology and Medicine (next offered SP16)
- BME 5600 - Biotransport and Pharmaceutical Delivery
- BEE 4940 – Design and Analysis of Biomaterials
- BME 5620/MSE 5620 – Biomineralization: The Formation and Properties of Inorganic Biomaterials
- BME 5390/FSAD 4390 – Biomedical Materials and Devices for Human Body Repair (next offered SP16)
- BME 5400 – Biomedical Computation* (next offered FA15)
- BME 5690/MAE 5690 - Clinical Biomechanics of Musculoskeletal Tissues
- BME 6650 – Principles of Tissue Engineering
- CHEME 7770 – Advanced Principles of Bimolecular Engineering
- MAE 4640/BME 4640 - Orthopaedic Tissue Mechanics
- MSE 4610 – Biomedical Materials and their applications

**List for Biomedical mechanics and biomaterials area:**

**Fall Courses:**
- BME 5810 – Soft Tissue Biomechanics
- BME 6690 - Biofluid Mechanics and Physiological Transport
- BEE 4940 – Design and Analysis of Biomaterials
- BME 6640/MAE 6640 – Mechanics of Bone

**Spring Courses:**
- BME 5390/FSAD 4390 – Biomedical Materials and Devices for Human Body Repair (next offered SP16)
- BME 5620/MSE 5620 – Biomineralization: The Formation and Properties of Inorganic Biomaterials
- BME 6501 - Natural Engineering: Developmental Biology Paradigms for Regenerative Medicine
- BME 5690/MAE 5690 - Clinical Biomechanics of Musculoskeletal Tissues
- MAE 4640/BME 4640 - Orthopaedic Tissue Mechanics
- MSE 4610 – Biomedical Materials and their applications

**OPTIONAL: Internship Track:**

BME 5940 – Master of Engineering Internship (Fall/Spring. 1 credit. S/U grade)

Off-campus internship with industry in which a student gains knowledge and experience in the field of Biomedical Engineering.

**OPTIONAL Technical Electives:**

These are optional technical electives, not all students need to take a technical elective course.

Courses that are automatically approved are:
1). Any course at the 5000 level or above offered by the College of Engineering
2). Any course at the 4000 level or above offered by the Department of Physics (College of Arts and Science), the Department of Chemistry and Chemical Biology (College of Arts and Sciences), or the various departments in the College of Agriculture and Life Sciences or the College of Arts and Sciences that participate in the Biological Sciences.
3). Any courses in the Johnson Graduate School of Management in the NBA or NCC categories at 5000 level or above (e.g., NBA 5070 – Entrepreneurship for Scientists and Engineers. Fall or Spring).
4). Courses taken to satisfy “Undergraduate Biomedical Engineering Preparation” and “Undergraduate Biology Preparation.”

Please list courses to be taken as part of your MEng degree program at Cornell:

______________________            ______________________          ________________________         ________________________

*BME 5400 will only count for one research area not all three research areas.*
